PROJECTS

E-Commerce Backend Project - Java, Spring Boot, Spring Data JPA, Hibernate, MySQL, Microservices, REST APIs

- Developed a backend e-commerce application with RESTful APIs for Users, Products, Addresses, and Orders.
- Implemented CRUD operations using Spring Data JPA and Hibernate with MySQL database integration.
- Applied Spring Cloud Eureka for service discovery and structured components using layered architecture and DTOs.
- Implemented input validation and centralised exception handling; tested API success and failure cases using Postman.

Order Management System - Java, Spring Boot, Spring Data JPA, Hibernate, MySQL, REST APIs

- Developed RESTful APIs to manage Orders, Customers, and Products using Java and Spring Boot.
- Implemented CRUD operations and integrated MySQL using Spring Data JPA and Hibernate.
- Applied Java Collections and Java 8 Streams to support business logic and data processing.
- Added input validation and exception handling; tested API functionality and error scenarios using Postman.
